The Project Management Institute (PMI) PMP® certification is accepted worldwide as proof of project management experience and competence. Having the PMP certification proves that you have an advanced level of experience and project management knowledge. Our PMI Examination Preparation course will refresh your existing PMP knowledge and equip you with the skills required and all the steps needed to pass the examination leading to PMP certification. It will familiarise you with the Project Management Body of Knowledge (PMBOK) standard, its nine knowledge areas and five process groups. We will familiarise you with the format of the examination and with the types of question asked, and give you chance to practise examples of those questions.

By the end of this course you will be able to:

- Define portfolios, programmes and projects
- Describe the project lifecycle and organisational influences
- Monitor and control project processes
- Create a project plan and use it to monitor and control a project
- Define requirements and a work breakdown structure
- Define and sequence activities and estimate durations
- Create a budget and control costs
- Identify and communicate effectively with stakeholders
- Perform quality control
- Identify and manage project risks
- Build, develop and manage a project team
- Conduct procurements

Did you know?

If you're not sure which course is right for you, we have experts who can help you

Delegates give up their valuable time to train with us and we promise to give nothing less than our very best to ensure they achieve their learning goals. We strive to provide the best opportunity to join our ranks of successfully qualified delegates – our above national average pass rates for accredited courses stand as a testament to our commitment to maintaining a quality service.
