The M\_o\_R courses will equip you with a detailed knowledge of the M\_o\_R method including the eight principles, the four main process groups and the core techniques essential to managing risks using the M\_o\_R guidance. This course lays a firm grounding for delegates to apply the M\_o\_R guidance to strategy, programmes, projects and operations in the work place. The successful completion of the Foundation and Practitioner examinations will give you a recognised Practitioner qualification. Maven is also a Registered Education Provider for PMI and this course carries 27 Professional Development Units (PDUs).

#### By the end of this course you will be able to:

- Describe the key characteristics of risk and the benefits of risk management
- List the eight M\_o\_R Principles
- List and describe the use of the key M\_o\_R Approach documents
- Create Probability and Impact scales
- Define and distinguish between risks and issues
- Create a Risk Register
- Create a Stakeholder map
- Identify the key roles in risk management
- Use the key techniques and describe specialisms in risk management
- Undertake the M\_o\_R Foundation and Practitioner examinations

> Learning Objectives

Delegates give up their valuable time to train with us and we promise to give nothing less than our very best to ensure they achieve their learning goals. We strive to provide the best opportunity to join our ranks of successfully qualified delegates – our above national average pass rates for accredited courses stand as a testament to our commitment to maintaining a quality service.

> Why choose Maven?

- Change Management Foundation and Practitioner
- MSP® Advanced Practitioner

> Follow-on courses

### Introduction

- Defining risk and risk management
- Identifying common risk management problems and how M\_o\_R can help overcome these

### M\_o\_R Principles

- An overview of the eight principles underpinning the M\_o\_R
- How the principles can be used to perform a risk management health check

### M\_o\_R Approach

- Key documents
- Supporting documents: Records, Plans and Reports

### M\_o\_R Processes

- A detailed explanation of the process model and lifecycle which form the basis of the M\_o\_R method

### M\_o\_R Techniques

- A description of various practical techniques which can be used to identify, assess, plan and implement risk management and support communications and reporting

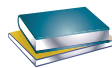

### Examination Preparation

- Review of examination questions, mapped against key areas of the M\_o\_R manual
